TECH CONNECT TIPS

i-Ready Frequently Asked Questions

What is i-Ready?

i-Ready provides students with lessons based on their individual skill level and needs, so your student can learn at a pace that is just right for them. The **i-Ready Diagnostic** is an assessment that adjusts its questions to suit your student's needs. i-Ready is designed to support what is being taught in the classroom. Your student's teacher will have information from i-Ready that shows where some extra review could help.

How do I log in to i-Ready from home?

Your student should log in to **Clever** using their district/school portal credentials and then click on the i-Ready icon. For student security purposes, usernames and passwords are managed by your student's school/district. Please contact your student's teacher/school if your student cannot log in successfully.

How can I help my student start a lesson?

1. **My Path.** Your student should click the green Next Lesson button to begin the next lesson in your student's personalized lesson path.
2. **Teacher-Assigned Lesson.** If your teacher has assigned your student additional lessons, they will see a blue button. Click the blue button to begin these extra lessons. Note: If your student only has a green button reading "Math Diagnostic" or "Reading Diagnostic," this means the Diagnostic assessment has been assigned. Your student should not work on their assessment at home.
3. **Complete lesson.** Your student should complete their lesson, trying their best. Please do not help during the lesson, as your student's lesson is just right for their level, and it's important for their teacher(s) to get accurate data about what your student knows and needs to learn. Note: Your student should aim for 45 minutes of i-Ready instruction per subject per week and maintain a range of 30–49 minutes of Personalized Instruction. Your student's school may have varying guidance.
4. **Learning Games.** If your student's school has access to Learning Games, they can click the Learning Games icon on the bottom right. Learning Games provide mathematics fluency and skills practice that fosters internal motivation while encouraging productive struggle. Students should play games for roughly 20 minutes weekly.

How do I check my student's progress?

1. **Log in** with your student's username and password.
2. **View** your student's "My Progress" box.
3. **Click on** "Completed Work" to see your student's progress.

How does i-Ready scale score work?

Scale scores help your student's teacher determine their placement level (within their current grade level, one grade level below their current grade, or two grade levels below their current grade). However, scale scores alone do not tell the whole story of your student's skills mastery.

What is considered passing a lesson?

The default passing threshold for i-Ready lessons is 67 percent, or two out of every three questions correct, but your school district has the flexibility to adjust the passing rate. Please check with your student's teacher to find out the passing rate in your school.
